Data extract

Business processes are the heart of each of AEB's application. They form the starting point and define the end goal. Description and frequent optimization of all processes are of key importance.

Our service

The creation of standard data extracts that contain data from your global trade process. A data extract is generated from your archived transactions. The archived data is usually available one to two days after ATLAS processing.

You can then generate meaningful statistics yourself and are prepared for possible tax audits or customs audits. Data extracts are possible for systems hosted in the AEB data center.

Your benefits

- Your data is available as CSV or XLS file
- Extracts contain information on header and item data
- Subsequent evaluation on Excel basis possible
