

Generate added value through additional benefits: AEB professional services

---

## System Checkup

The role of application management is to map and implement the business processes as successfully as possible.

## Our service

An AEB employee comes to your company and checks the current status of your ASSIST4 environment, gladly together with your key users.

This joint check of your system is used as an opportunity to set up smaller automations, exchange tips and tricks with your users and question existing business processes. In addition, we check your data and suggest improvements that may be implemented immediately during the on-site visit depending on the circumstances (e.g. setting up delete batches etc.).

## Your benefit

- Professional check of your ASSIST4 system
- Performance optimization
- Quality improvement of processes within the software
- Skilled employees
- Identification of possible additional measures for system improvement

## The options

The system checkup can either be half-day or full day.

## The requirements

None.

## The costs

System Check Up (full day) EUR 1,100

System Check Up (half-day) EUR 500

Prices do not include travel expenses and allowances.
