

Generate added value through additional benefits: AEB professional services

Update Service: Test System Refresh

Ensuring a continuous application operation also guarantees the agreed availability of the application.

Our service

We create a copy of the productive database and install it in the test environment. We make sure that all settings such as batches, folder structures etc. are retained and there is no impact on the production environment.

Your benefit

You have a current image of your production environment available and can use it for testing purposes and customization.

The options

Data transfer via migration tools from the production environment to the test environment; customizing by the specialists from AEB.

The requirements

Access to the customer's system environment, DB admin rights.

The costs

EUR 550 per refresh.
