

Generate added value through additional benefits: AEB professional services

---

## System Design Support

Ensuring a continuous application operation also guarantees the agreed availability of the application.

## Our service

Would you like to use ASSIST4 at your premises and therefore need an optimal integration into your existing systems? We scale and dimension your system landscape. To ensure that your processing power and system stability are in the right proportion to the applications you are using.

## Your benefits

- AEB's expert knowledge
- Increase in quality and, accordingly, an increase in performance
- Error prevention
- Reduction of downtimes
- Avoidance of unnecessary hardware investments

## The options

To be determined individually.

## The requirements

Openness on the part of all participants and you passing on the necessary information are essential. If it hasn't already happened in the course of a project, a confidentiality obligation should be defined in advance.

## The costs

Costs according to expenditure – one-time.
