

Generate added value through additional benefits: AEB professional services

Sending e-mails from ASSIST4

Ensuring a continuous application operation also guarantees the agreed availability of the application.

Our service

We install our e-doc module in your system. This module enables you to send documents as an e-mail directly from ASSIST4. You may want to send them to your customer or a supplier.

We define together your requirements for sending e-mails and perform technical installation and configuration of the e-doc module.

Your benefit

You no longer need to print and subsequently scan documents to send them as an e-mail attachment. You can send e-mails from ASSIST4 either manually with a few clicks or automatically. Your e-mails can also contain data such as for example a delivery note number, a consignment number or the customer order number.

The options

We define together your individual requirements. The following options are available:

- PDF-XFA - Sending single documents as an e-mail
- Sending multiple documents in one e-mail
- Automatic e-mail sending

The requirements

You must license our e-doc module. License costs for the e-doc module: EUR 900 plus annual license fee 18%.

The costs

Costs depend on the agreed functionality. We offer you the following standard package.

Standard in general:

Our standard offering includes setting up and configuring up to three documents to be sent via e-mail and creating two e-mail templates using easy text components. Costs for module installation EUR 600.
