

Generate added value through additional benefits: AEB professional services

Content Service: Master File Data

Application support is ensured continuously as needed to guarantee the agreed availability of the application.

Our service

Business processes supported by the AEB software are subject to ongoing changes. Some of the master data changes often and the quality of a system relies on the quality of master data maintenance. This is why AEB, with its experts, offers updates of various master data.

Master file tables are available for download from the customer portal and can be downloaded as often as you want. Subsequently you can import them into ASSIST4 via the import functions.

Your benefits

AEB provides you with the latest up-to-date master data to be imported into ASSIST4. This way you neither need to research for the modifications yourself nor do you need to bother to manually update your master files.

The options

Currently the following options are available:

- IATA exchange rates (import/export) *(updated daily)*
- Packaging codes (export) *(updated monthly)*
- Document: Export (export) *(updated monthly)*
- Document Type: Import (import) *(updated monthly)*
- Customs rates (exchange rates import) *(updated daily)*
- Customs offices (export) *(updated monthly)*
- Others on request

The requirements

Internet access.

The costs

For each master file table EUR 120 as part of an annual subscription, minimum duration of 12 months.
