

Generate added value through additional benefits: AEB professional services

---

## Database Installation

The basic database services such as administration, monitoring, patch management, data export and import, backup and restore are critical importance for proper functioning and a sound operation.

## **Our service**

We take over the installation and configuration of your database.

## **Your benefit**

No need for a DB administrator within your IT. Optimal configuration of your database through expert guidance and customization of your application.

## **The options**

In addition to your installation we also provide guidance on choosing a database suited to your needs. Professional advice on licensing is not included in this service.

## **The requirements**

We come on-site for installation and initial setup. All the required information, and in particular any access information should be made available. Details will be agreed upon in the SLA.

## **The costs**

Upon mutual agreement.
