

Generate added value through additional benefits: AEB professional services

---

## Database Administration

The basic database services such as administration, monitoring, patch management, data export and import, backup and restore are critical importance for proper functioning and a sound operation.

## **Our service**

We act as a DB administrator on your behalf - taking this responsibility off your shoulders.

## **Your benefit**

No need for a DB administrator within your IT. Optimal configuration of your database through expert guidance and customization of your application.

## **The options**

In a joint workshop we collect information on your systems and agree with you upon the scope of the service.

## **The requirements**

A remote maintenance access on all servers should be available and accessible to the AEB in order for us to install and monitor your database. Details will be agreed upon in the SLA.

## **The costs**

Upon mutual agreement.
